Stop, Look, Listen

Always close gates after use

THE RAIL CROSS CODE

Use the **Rail Cross Code** each time you cross:

ALWAYS EXPECT A TRAIN!

Stop, look both ways and listen

- **Stop** – behind the White line or Black & Yellow markers where provided.
- **Look both ways** – watching for the lights of approaching trains.
- **Listen for a train horn** - no radio, no earbuds or headphones!
- Give way to trains – let any approaching train pass, then look both ways again.
- When the railway line is clear, cross quickly. Never stop on the railway line.
- Close the level crossing gates after use – it's the law.

Always close gates after use
– it's the law

Dos ✓

- Always expect a train
- Always use the Rail Cross Code at unattended railway crossings
- Always obey road signs and markings, and train warning lights
- Always switch off music systems and put away mobile phones
- Always control children and animals in your care
- Always dismount if you are a cyclist or horse rider
- Always shut and fasten the level crossing gates after crossing the railway line

Don'ts ✗

- Don't use railway signals to determine if a train is or is not approaching
- Don't drive onto the railway line until you can ensure sufficient clearance on the other side
- Don't automatically follow a vehicle across the railway level crossing – always **stop, look and listen**
- Don't stop on the railway level crossing
- Don't overtake another vehicle on or when approaching the railway crossing
- Don't play the radio, or wear hoods or headphones, on or near the railway tracks

Knowing the Dangers

- Trains travel fast and cannot stop suddenly.
- Shut and fasten all level crossing gates at all times. Leaving gates open can result in children or animals accessing on to the railway line and may encourage unsuspecting drivers of vehicles to drive onto the level crossing before checking that it is safe to do so.
- Trains can be very quiet and this is particularly the case on modern rails.
- The use of earbuds or headphones and the use of radios will affect your ability to hear approaching trains. Remember the wearing of ear protectors will also affect your ability to hear trains. Mobile phones must not be used during the process of using the level crossing.
- Be aware that weather conditions such as mist, fog, or snow may affect your ability to see approaching trains.
- When crossing the railway line with slow, heavy, low-slung or cumbersome vehicles, vehicles conveying dangerous substances and with herds of animals you must ring the Freephone number displayed on safety signage at the level crossing.
- During the hours of darkness, take extra caution when checking for approaching trains as it might be possible to confuse train headlights with car headlights if there is a roadway parallel to the railway line.
- Every time you cross the railway, remember the **Rail Cross Code**.

When crossing, follow the instructions given on signage displayed at the level crossing, or if in doubt, contact Iarnród Éireann on Freephone number provided

Driving Vehicles, including Trailers across the Railway Line

- Make sure that your vehicle, including tow bar and trailer, is in good mechanical condition and unlikely to stall on the level crossing.
- Make sure that the handbrake is in good working order.
- Make sure that the vehicle is not fogged up inside and that all the windows are clear of snow, ice and dirt and that nothing is blocking your view.
- **Open** at least one window (driver's side) before crossing the railway line.
- **Turn off** all radios or stereos and remove any earbuds or headphones. Noise may mask the sound of an approaching train. Mobile phones must not be used during the process of working the level crossing.

- **Stop** clear of the railway line to ensure a good view along the track in both directions. **Look** for the approach of trains, especially in poor visibility or at night. **Watch out** for the light on an approaching train. When using the level crossing, open both gates before attempting to drive your vehicle across the railway line.

- Use the black and yellow marker posts, where provided, when stopping. If there are no such markers then stop at least 2 metres (6 feet) clear of the nearest rail.
- If in doubt, ring the Freephone number displayed on the red and yellow safety signage for further information.
- Should a vehicle suffer a breakdown or become grounded on the level crossing, make sure all vehicle occupants exit the vehicle and clear the railway line immediately to a point of safety. Then contact Iarnród Éireann on the Freephone number found on signage **immediately**.
- Having used the level crossing, always close the gates after you – **it's the law. Failure to shut and fasten the gates is dangerous and you could be prosecuted.**

Pedestrians and Cyclists crossing the Railway

- When approaching the railway line, pedestrians and cyclists should always remember the **stop, look and listen** rule.
- Pedestrians and cyclists on seeing an approaching train should wait behind the white line and never run or cycle across the railway line in front of the train.
- Railway signals must never be used to determine if a train is or is not approaching.
- When standing clear of the railway line keep at least 2 metres (six feet) from the nearest rail or stop behind the white stop line, and / or black and yellow markers.
- Take care not to push a pram too close to the railway line when looking out for trains or while waiting for trains to pass.
- Children of primary school age, especially with bicycles, should never be allowed to cross the railway line alone.
- Cyclists must dismount and walk across the railway line, even if the gates are open.

- Should a bicycle wheel become jammed on the level crossing in the track, and should a train approach, then the bicycle should be abandoned and the person involved should move to a place of safety, clear of the railway line. Contact Iarnród Éireann on the Freephone number found on signage immediately.
- Dogs must be kept on a lead when using a level crossing.
- If your dog escapes your control and runs onto the railway line, do not be tempted to run after it.
- Pedestrians and cyclists should be alert to notice any problem with a level crossing and should telephone details of such to Iarnród Éireann by using the Freephone number found on signage.
- Always expect a train! Trains can come at any time. It is dangerous to try to 'predict' when a train might come by relying on the railway schedule, a railway signal or the position of the gates at a nearby railway crossing. A railway signal of any colour, or even a level crossing gate placed across the railway line at a nearby attended railway level crossing, cannot tell you that it is safe to cross.
- Read all the signs at the crossing.
- Remove your headphones, earbuds, hood or any clothing that might affect your sight or hearing.
- Put away your mobile phone.
- Use the **Rail Cross Code** each time you cross the railway line.
- Never walk along the railway line.
- Obey traffic lights, where provided.
- Only cross at a marked or designated railway line crossing.

- Dismount if you are on a bicycle or horse.
- Hold onto children near the railway line and keep dogs on a lead.
- If crossing with a pram, wheelchair or bicycle, take care to avoid getting the wheels caught in the tracks.
- Once you have safely crossed the railway line, you must shut and fasten the gates. Even if you found the gates open when you arrived, you must shut and fasten them after you to protect others – **it's the law. Failure to shut and fasten the gates is dangerous and you could be prosecuted.**

Unusual Movements across Railway Level Crossings

Contact Iarnród Éireann on the Freephone number found on signage beforehand if you are:

- Arranging special events such as matches, funerals or processions that will involve crossing the railway line,
- Driving an awkward vehicle – for example, a long, low, wide, heavy or slow vehicle, moving vehicles with dangerous, unusual or very heavy loads, crossing the railway line with a crowd of people, and
- Crossing the railway line when herding animals.

Use the Freephone number which you will find at the railway level crossing.

If you are driving a very high vehicle and using a railway crossing with overhead electrified lines, such as on the DART network, please note that the general safe head-room is 5 metres.

Emergencies at Railway Level Crossings

If an animal strays onto the railway, or if a pram, wheelchair, bicycle or other vehicle gets stuck on the railway line, you must take the following actions:

- Get clear of the railway, leaving the animal, pram, wheelchair, bicycle or vehicle where it is,
- Move everyone well clear of the railway line,
- Contact Iarnród Éireann using the Freephone number which you will find on the instruction sign at the entrance to the level crossing, say 'This is an Emergency', and
- State the identification number (crossing number) shown at the railway level crossing.

This identification number is different for each railway crossing
